EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Richard E. Fontana on May 7, 2004.

The application has been amended as follows:

- Delete ~~claims~~ 22-37.

Reasons for Allowance

2. Claims 11-15 are allowed.
3. The following is an examiner's statement of reasons for allowance:

While Mun in view of Russell et al discloses an architecture of a home automation system for automatically executing operations in the home including a power line controller PLC modules for switching power to appliances in response to a control code, an apparatus for monitors and analyzes sample parameters of power line load signal, and finally for detecting superimposed transmissions from the power consuming devices on the power line, which signal problems associated with the power consuming devices.

Neither of these references taken either alone or in combination discloses an architecture for an automation system having all the claimed features of applicant's instant invention,

Art Unit: 2121

specifically including: "a lookup service maintaining a database of the power consuming devices including their attributes of device type and physical location, and device objects corresponding to the power consuming devices including a name for each device object mapped to at least one address", "a soft state store managing refresh information for the power-consuming devices and the device objects" and "a publication/subscription eventing component enabling subscriptions to events related to changes in the refresh information managed by the soft state store ". Also, there is no motivation to combine the Mun reference with the Russell reference to meet these limitations. It is for these reasons that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner *Thomas Pham*; whose telephone number is (703) 305-7587 and fax number is (703) 746-8874.
